PROFESSIONAL SUMMARY

AIML Graduate with hands-on experience in Machine Learning, Deep Learning, and Generative AI. Skilled in Python, SQL, Linux, and AI-powered application development. Built projects including a Gemini AI Chat Bot, Road Accident Severity Prediction System, and Privacy-Preserving Machine Learning Framework. Passionate about solving real-world problems through Artificial Intelligence and continuously exploring emerging AI technologies.

EDUCATION

Hyderabad Institute of Technology and Management (HITAM)	2022 – 2026
Bachelor of Technology (B.Tech) – Artificial Intelligence & Machine Learning CGPA: 8.1	
TSRJC	2020 – 2022
Intermediate (MPC) 85.8%	

INTERNSHIP

Central Institute of Tool Design (CITD)	Hyderabad
Deep Learning Intern	2024
- Attended training sessions on Deep Learning, Neural Networks, and Artificial Intelligence concepts. - Learned the fundamentals of machine learning and deep learning through classroom instruction and demonstrations. - Gained exposure to industry applications of AI and Deep Learning technologies. - Successfully completed the internship program and received a Deep Learning certification.	

TECHNICAL SKILLS

Programming Languages: Python, SQL
AI & Data Science: Machine Learning, Deep Learning, Generative AI, Data Analysis
Tools & Platforms: Git, GitHub, Linux, Streamlit
Other Skills: Prompt Engineering, Problem Solving

PROJECTS

Gemini AI Chat Bot

Python · Streamlit · Gemini API · Generative AI — github.com/svk-19/Gemini-AI-Assistant

- Developed an AI-powered chatbot using Google's Gemini API for intelligent conversational interactions.
- Built an interactive web interface using Streamlit for real-time chat experience.
- Implemented prompt-based response generation and contextual conversation handling.

Road Accident Severity Prediction

Python · XGBoost · Random Forest · Streamlit · Scikit-learn

- Built a machine learning model to predict road accident severity (Fatal, Serious, or Slight) using historical accident data.
- Trained and compared multiple ML algorithms including Decision Tree, Random Forest, and XGBoost to find the best performing model.
- Deployed the model as a web application using Streamlit so users can input data and get real-time predictions.

Privacy-Preserving Machine Learning (PPML) Framework

Python · TensorFlow · Scikit-learn · NumPy · Pandas

- Developed a machine learning framework focused on protecting user data privacy during model training.
- Explored privacy-preserving techniques used in machine learning and developed a prototype framework for secure model training.
- Analysed the trade-off between model accuracy and data privacy, and documented findings.

CERTIFICATIONS

• Deep Learning – CITD	• Python Fundamentals – Infosys Springboard
• Power BI – Simplilearn	• Entrepreneurship – Simplilearn
• R Programming – Infosys Springboard	

KEY ACHIEVEMENTS & EXTRACURRICULARS

- Maintaining a CGPA of 8.1 in B.Tech CSE (AI & ML).
- Completed 5 industry-recognised certifications across Deep Learning, Power BI, Python, R, and Entrepreneurship.
- Self-Learning Cloud, AI/ML & Prompt Engineering.
