PROFESSIONAL SUMMARY

AIML Graduate with hands-on experience in Machine Learning, Deep Learning, and Generative AI. Skilled in Python, SQL, Linux, and AI-powered application development. Built projects including a Gemini AI Chat Bot, Road Accident Severity Prediction System, and a RAG-powered Document Assistant (SVK Doc AI). Passionate about solving real-world problems through Artificial Intelligence and continuously exploring emerging AI technologies.

Portfolio: vamshi-portfolio-lac.vercel.app

EDUCATION

Hyderabad Institute of Technology and Management (HITAM) 2022 – 2026

Bachelor of Technology (B.Tech) – Artificial Intelligence & Machine Learning | CGPA: 8.1

TSRJJC 2020 – 2022

Intermediate (MPC) | 85.8%

INTERNSHIP

Central Institute of Tool Design (CITD) Hyderabad

Deep Learning Intern 2024

- Completed training in Deep Learning, Neural Networks, and AI concepts — gaining exposure to industry applications of AI technologies.
- Successfully completed the internship program and received an official Deep Learning certification from CITD.

TECHNICAL SKILLS

Programming Languages: Python, SQL

AI & Data Science: Machine Learning, Deep Learning, Generative AI, Data Analysis

Tools & Platforms: Git, GitHub, Linux, Streamlit

Other Skills: Prompt Engineering, Problem Solving

PROJECTS

Gemini AI Chat Bot

Python • Streamlit • Gemini API • Generative AI — [GitHub](#) • [Live Demo](#)

- Developed an AI-powered chatbot using Google's Gemini API for intelligent conversational interactions.
- Built an interactive web interface using Streamlit for real-time chat experience.
- Implemented prompt-based response generation and contextual conversation handling.

Road Accident Severity Prediction

Python • XGBoost • Random Forest • Streamlit • Scikit-learn

- Built a machine learning model to predict road accident severity (Fatal, Serious, or Slight) using historical accident data.
- Trained and compared multiple ML algorithms including Decision Tree, Random Forest, and XGBoost to find the best performing model.
- Deployed the model as a web application using Streamlit so users can input data and get real-time predictions.

SVK Doc AI – RAG Powered Document Assistant

Python • Streamlit • Gemini • FAISS • RAG — [GitHub](#) • [Live Demo](#)

- Built a Retrieval-Augmented Generation (RAG) application for PDF/DOCX document question answering.
- Implemented document chunking, embedding generation, and semantic retrieval using FAISS with Gemini-powered response generation.
- Added document summarization, chat memory, and export features through a deployed Streamlit application.

CERTIFICATIONS

- Deep Learning** – CITD
- Power BI** – Simplilearn
- R Programming** – Infosys Springboard
- Python Fundamentals** – Infosys Springboard
- Entrepreneurship** – Simplilearn

KEY ACHIEVEMENTS & EXTRACURRICULARS

- Maintaining a CGPA of 8.1 in B.Tech (Artificial Intelligence & Machine Learning).
- Completed 5 industry-recognised certifications across Deep Learning, Power BI, Python, R, and Entrepreneurship.
- Self-Learning Cloud, AI/ML & Prompt Engineering.
